The figure shows a longitudinal profile of a road. The vertical axis represents elevation in meters (1:1000 scale), and the horizontal axis represents distance in meters (1:1000 scale). The profile includes the following data series:

- Profilo progetto (fondo impermeabilizzato):** Red line representing the proposed impermeable ground level.
- Profilo posa rifiuti:** Blue line representing the level for waste disposal.
- Profilo capping:** Green line representing the capping level.
- Profilo immersiono:** Brown line representing the immersion level.

The profile also shows the existing ground level (black line) and the proposed road level (grey line). The area between the existing ground and the proposed road level is shaded grey, indicating the required earthwork. The area between the proposed road level and the capping level is shaded green, indicating the required capping material.
